# INTRODUCING KLIMAT AUSTRALIA

Klimat Australia is the new name in climate control systems. Klimat's products range from adjustable and fixed louvres to door air grilles and aluminium sunshades. Backed by Lidco's 60 years experience in architectural framing systems, Klimat's focus is on developing this louvre market.

The Klimat Airview™ adjustable louvre is the perfect choice of window where maximum ventilation and thermal efficiency are an integral part of your building's design. Airview Louvres offer designers and homeowners the ability to create either a contemporary or traditional style and can be applied in a variety of applications.

The Airview Louvre™ keeps the weather out. The custom designed framing has been extensively tested by an independent NATA approved testing laboratory and has passed the requirements of AS2047 "Windows in Buildings".

The Airview Louvre™ is built to last. The use of low maintenance aluminium, UV resistant materials and stainless steel fittings provides for a long, trouble free life. Feel free to come and have a look at some Klimat™ systems at your nearest showroom.

# AIRVIEW LOUVRES™

## KEY FEATURES

### Better Built

- + Airview Louvres are an effective window system controlling airflow and light whilst offering complete weather protection
- + Insects are a thing of the past as the unique framing system has insect and safety screens as an integral part of the design
- + Klimat's Airview Louvre gallery accepts 102mm and 152mm louvre blades. The gallery is easily snapped into Lidco's framing systems, eliminating the use of screws to hold the louvre in position
- + A plant-in weather bar system is available to assist weather performance for timber and masonry installations
- + The Airview Frame is suitable for both residential and commercial applications

### Better Finished

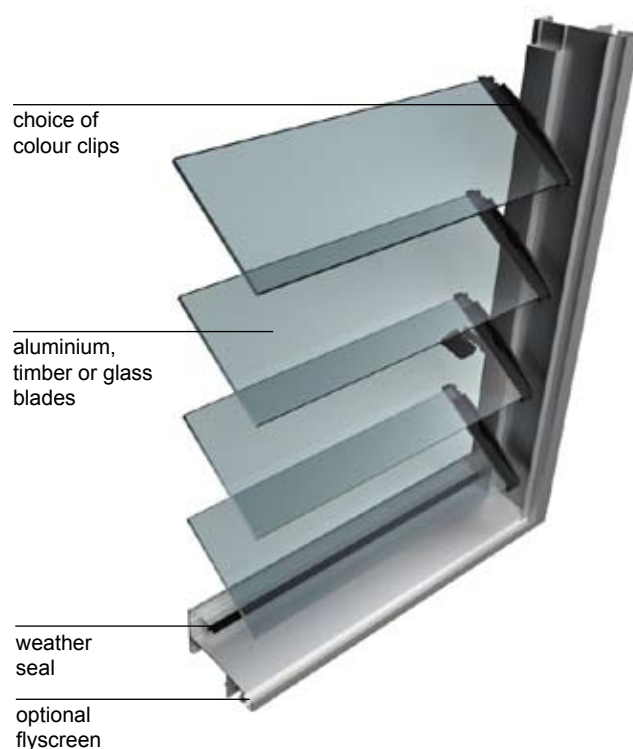

- + Slim lines combined with a variety of finishes make Klimat's Airview Louvres an architectural feature for your home
- + Featuring aluminium, glass or cedar blades, Airview Louvres offer the ultimate in design flexibility
- + Contemporary colours combined with a stylish bladeholder and easy to use opening mechanism make Airview Louvres the perfect choice

### Better Control

- + An extensive range of control gear adaptors allow the application of manual and remote opening mechanisms to be fitted
- + Torsion bar handle allows dual operation
- + Optional fixed glass extension allows adjustment of the louvre heights to suit non standard openings

### Better Security

- + Barrier bars can be installed into the Airview Frame
- + An integrated security system is available for Klimat Louvre systems
- + Aluminium security jamb adaptors are supplied pre-punched and can be finished to match the louvre's framing
